

### **NARRATIVE STATEMENT**

The Cass County Emergency Telephone System Board (ETSB) would like to modify their final plan to reflect the quickest and most economical handling of 911 calls. The Cass County ETSB shall accept one (1) Morgan County resident who resides in the Virginia (452) exchange. That caller's information shall be relayed to the Morgan County PSAP via the telephone / radio for police and fire emergencies and to the Passavant Area Hospital for medical emergencies. The Cass County ETSB shall only answer for the residents who live in Cass County who have an Arenzville (997) exchange.

Morgan County 911 shall answer approximately 77 Morgan County residents who have Arenzville (997) exchanges. Morgan County 911 shall also answer approximately 34 Meredosia (584) exchange customers who reside in Cass County. All information collected concerning a Meredosia exchange customer shall be relayed to the Cass County PSAP via telephone/radio.

The Cass County ETSB was granted the authority to answer the 87 Mason County residents in their original application. The petition reflects all opted in and out customers for Cass County.

This arrangement has been agreed upon by both the Cass County ETSB and the Morgan County ETSB through a cooperative service agreement. Any changes made to this arrangement shall be agreed upon by both ETSB's and a modification submitted to the Illinois Commerce Commission for approval.
